

Lunarfins Scuba Club

Next Meeting: Tuesday, March 15th at 6:30 p.m.

In Person– Live meeting with Kristen Maples, and Amanda Weiler

Kristen Maples started her dive career 25 years ago but has been passionate about the underwater environment since she was a child. This passion led her to a career of working as a biologist. She has experience working in environmental toxicology labs, Fish and Wildlife population studies, animal husbandry with a specialty in octopuses and sharks, and environmental education.

Amanda Weiler has been diving since 2005 when a unique course was offered to her in landlocked northern Illinois and brought her to four nations in the Caribbean. Her passion led her to a BS in marine biology at the University of Tampa and then a career in dive safety and management at the Shedd Aquarium in Chicago, IL and at Moody Gardens Galveston, TX. Along the way Amanda earned her NAUI Instructor, PADI Instructor, and DAN instructor rating as a dive professional

As a new Advisory council member, Kristen will introduce herself as well as provide updates about what is happening within the FGNMS. She will also introduce a new event that she is working on with Fling charters. Kristen is happy to discuss upcoming Gulf diving opportunities and answer any questions.

Amanda, working as a Dive Officer at Moody Gardens, has participated in research cruises in conjunction with NOAA as well as completed training and assisted in the development of an exciting new dive program aimed towards long term monitoring efforts. She is excited to share all of this with Lunarfins members.

(See Page 5 for more information on our speakers)

Lunarfins Board Meetings
are held each month
(except December) at 6:30 PM.

Will be ZOOM only

*If you have an item to bring before the board,
contact any board member to get on the agenda.*

Events Calendar

(Tentative plans)

Membership

**2022 Membership dues are
Now being accepted.**

Membership runs from April 1st,
2022 to March 31st 2023

The renewal form is required
each year in February.

*Please bring the form (below) to
the next meeting or mail it in.*

*Please fill in all fields completely
so that records can be verified
this time around.*

*Don't forget to check your
interest (s) and if you want to
be included in the directory.*

Membership Application

<https://www.lunarfins.com/>

**Mar. 15th — General Meeting — Kristen Maples — Our
newest SAC (Sanctuary Advisory Council) member &
Amanda Weiler — Dive Officer at Moody Gardens**

Apr. 2, 3 — Houston Underwater Film Festival (HUFF) - Pg.11

**Apr. 19th — General Meeting — Paul Cater Deaton —
Bethlehem in the Bohol Sea — Philippines**

Apr. 21st— Barbeque at Dusty Manning's — See Pg 7

**May 17th — General Meeting — Sage Holt — Blackwater
Diving**

For those Lunarfins having SCUBA cylinders requiring hydrostatic testing,
Western Sales & Testing is recommended. They will also do a VIP if requested.

They are located at 2814 East P Ave., Deer Park.

*Folks! Please remember, the more you volunteer for leadership
or to be in charge of an event. The more you enjoy your club.*

Lunarfin's President's Notes

March 2022

Welcome,

Last month we had a super fun speaker with animated stories and underwater videos by Justin Wallace! He inspired many about going to the Maldives, getting gear and taking videos. There is so much to learn at our meetings about diving, photography, places to visit, and meeting fun people! Our new projector was a hit and thanks everyone for supporting it! On March 15 we have Kristen Maples from the Sanctuary (Flower Gardens) Advisory Council and Amanda Weller from Moody Gardens, who will discuss research programs at Flower Garden Banks and the new rebreather program at Moody Gardens. Come out to Las Haciendas on March 15 at 6pm. Dennis Deavenport will give us an update on HUFF.

2022/2023 elections will be held on March 15, and we need good representation to vote. We are still specifically looking for a Treasurer and a Secretary. John Gorman will help us until we find a new Treasurer. He can easily train you and it's not a lot of time. Please consider participating in this great club. The Lunarfin's club has a lot to offer the diving community and it takes a great group of folks. Submit your nominations to Ja Van Pruett and we will take nominations from the floor as well.

2022/2023 is a great year to be a part of the club as it is our 60th anniversary in 2023 founded in 1963! We want to start planning fun activities for 2023 with fun anniversary swag! What type of anniversary logo items would you like shirts, mugs, caps? We will be planning activities and the budget at our April Board meeting. Do you need scuba training or photography instruction? Let us know how the club can help you. Are you are interested in trips, volunteering as a group at local events, tours, others? Tell us your ideas!

Dues for 2022/2023 are to be paid by March 31,2022 and are \$25 for individuals and \$35 for families. I am advising holding checks to deposit on or near April 1 so that we have our budget in-line for income and expenses for 2022/2023. In the past, we have had part of the dues deposited in one Lunarfin's year and part of the dues deposited into the next Lunarfin's year. Thank you for your patience on this!

Join us for our upcoming activities and be a part of this fun group of divers by participating!

Elections March 15, 2022 General Meeting

- JaVan Pruett is leading nominating committee for 2022 elections and presents

- **Slate of Officers:**

- President- Cindy Reuland
- Vice-President- JaVan Pruett
- Treasurer- John Gorman
- Secretary- Open
- Social Director- Brion Saathoff

- **Any nominations on the floor**

- **President appointed positions in April:**

- Trip information officer
- Training information officer
- Lunarscope newsletter editor
- Webmaster
- TGCC representative

Thank you

Our speakers for February meeting was **Justin Wallace**.

He gave an outstanding presentation, his humor had everyone laughing. Justin explained how he got into diving and photography. He showed us his equipment and how he preformed his talent. Justin video's and stills were out of this world.

If you missed, I am so sorry for you. To follow his work. <https://www.instagram.com/jwunderwaterphotography/>

New Logo Lunarfins T-shirts

Would you like a New Logo Lunarfins T-shirt? We have two colors the first order. If you would like to have one or more two styles, Blue or Red, a Crew or a V-Neck. We have only 3 left. Please contact Brion Saathoff at @ brionsaathoff@icloud.com. Or JaVan Pruett @ caladyfish@gmail.com

Pending Events

21th Annual Bill Jones 2022 COZUMEL Vacation Package

More info on our Speakers

Kristen has worked with countless international high school students for a discover scuba/science program, has completed training of new and experienced divers, led day charters for Gulf dives and international trips. Her belief is that any day spent with someone underwater is a great day. Now, as co-owner, her and Craig have expanded Texas Scuba Adventures to bring it to Galveston and are excited about bringing this experience to the Galveston community and visitors. In addition, Kristen currently holds the Dive Operation seat on the Flower Gardens Sanctuary Advisory Council.

Amanda has spent over 100 days at sea in The Bahamas and the Florida Keys as a dive safety officer and researcher where she helped survey queen conch, set up acoustic monitoring arrays for sharks and grouper, measured spiny lobsters with hand-held lasers, and transported endangered corals for thousands of kilometers. Since arriving in Galveston, she is excited to continue to grow her connections in the dive community and share her passion for the aquatic world. And when she's not diving, she can be found behind a pair of binoculars enjoying the diversity of birds Texas has to offer!

Moody Garden's Dive Program (MGDP) provides science diver support to the Federal agency responsible for the management of Flower Garden Banks National Marine Sanctuary. Efforts support various field projects including invasive lionfish removal, long term monitoring surveys, water quality monitoring, buoy maintenance and deep station surveys and installation. This support has been helping FGBNMS achieve research, monitoring, and management goals. In turn, FGBNMS provides unequalled opportunity to directly support initiatives which enhance Moody Gardens' guest experience, staff development, and their mission.

The MGDP, through support of AZA accredited dive programs, will expand its capability for involvement to conservation and research endeavors in the photic and mesophotic zones. Between the Moody Gardens Dive Program (MGDP), multiple Associations of Zoos and Aquariums (AZA) institutional dive programs, and academic institutions and two federal agency dive programs, there have been discussions pertaining to the potential benefit to exhibit maintenance, animal observations, and marketing resources. These discussions were namely on how to share resources within the group such as expanded diving technology, dive instruction and training opportunities, equipment, outreach, and field collaborations. This will include use of alternate diving technology that is emerging as safe, efficient, and reliable. The Moody Gardens Dive Program will not drive the conservation and research initiatives of the Gulf of Mexico, and will instead support these endeavors as they best fit within institutional and departmental missions and capability.

Welcome! to our New Member

Paul Cater Deaton

Is an award-winning Writer, Producer, Director and Cinematographer. Based in Galveston, he works all over the world.

PCD is a noted documentary producer and photojournalist, And now a co-host for a live webcast of the [Mardi Gras! Galveston](https://paulcaterdeaton.com/) Fat Tuesday Parade!

Scuba News

Stingray Covers Diver Like a Blanket

Sent in by Mike Peters

Is there anything in the world that we love more than cuddling with our pets? Feeling the love, the warmth, being able to give them affection - we love it. In fact, we want to cuddle with all animals - no matter which ones. We see a dangerous lion – we want to cuddle it. We see bears - cuddles. We see wolves - cuddles. But have never looked at a stingray and thought - cuddle buddy. Until today.

We thought sea creatures were not particularly interested in human contact. In fact, we know that some sea creatures are huge jerks. So, when we saw this picture of a stingray covering a diver like a blanket, our whole world turned upside down. Now, we don't know if it really makes sense to call what this stingray is doing cuddling - we don't know what it's thinking here, but we choose to believe that it is. Because cuddles. With animals. We want that.

Stringrays can't see underneath their bodies. That's why they've evolved specialized organs that let them sense the electricity released by small animals moving under the sand; bottom-feeding species have to hunt with their eyes looking the opposite direction of their mouths. It looks like the diver was already near the seabed (maybe actually resting on it) before the ray decided to settle on top of him. It describes the ray as hovering for a moment over him before descending, which isn't an uncommon behavior to see when a ray is scoping out the environment for threats before coming to rest.

Scientist Find Baby 'Ghost Shark' With Striking Ghostly Appearance

Sent in by Mike Peters

There is definitely so much we don't know about the creatures that live in the water. So, when we find something that make their way up to the surface, we it's extremely fascinating. We wonder what family does this magnificent ghostly creature belong to, he looks like a cross between a stingray and a catfish.

"Late last week, New Zealand scientists made the rare discovery of a baby ghost shark during a recent survey. 'What we do know tends to come from the large adults which are usually a meter, a meter and a half in length, so finding one that actually kind of just sits in the palm of my hand is incredibly uncommon,' Brit Finucci, a scientist at the National Institute of Water and Atmospheric Research, told Reuters."

2022 New Dive Gear

Descent™ Mk1

Silver Sapphire with Black Band

PART NUMBER 010-01760-00

[Check out the new Descent™ Mk2 Series](#)

For more info.: <https://www.garmin.com/en-US/>

Versatile GPS Dive Computer for Your Diving Adventures

- Premium full-featured dive computer with surface GPS in a sleek watch-style design; with bright 1.2" color display and TOPO mapping
- Built-in sensors include 3-axis compass, gyroscope and barometric altimeter as well as GPS and GLONASS capability that lets you mark your dive entry and exit points¹ for surface navigation
- Choose modes for single and multiple gas dives (including nitrox and trimix), gauge, apnea and closed circuit rebreather (CCR); plan your dives directly on the device
- Dive log lets you store and review data from up to 200 dives — and share online via Garmin Connect™ and its included mobile app
- Features Elevate™ wrist heart rate technology² with multisport activity profiles, performance metrics and smart notifications³
- Battery life: up to 19 days in watch mode, 10 days in smartwatch mode, 40 hours in dive mode and 20 hours in GPS mode

Whether you dive with or without tanks, in saltwater or freshwater, breathing nitrox, trimix or holding your breath — Descent Mk1 is the intuitive, do-it-all dive computer you've been waiting for. It's the first watch-sized dive computer to offer surface GPS navigation with full-color onscreen mapping and location reference — so you can easily mark your dive entry and exit points¹.

Once underwater, the proven Bühlmann ZHL-16c algorithm makes sure you're staying within your dive limits. Selectable tone and vibration alerts help keep you informed while you're submerged. Returning topside, Descent Mk1 also functions as a robust training companion, offering the best features of our fēnix® 5X ultimate multisport GPS watch, including smart notifications³ to help you stay in touch on the go. What's more, the Descent Mk1 design is so sleek, comfortable and elegantly crafted, you'll want to wear it as your everyday timepiece

The Programs

Houston Underwater Film Festival 2022

Saturday, April 2, 7 pm Show

Short Video

1. A Change in Seasons Underwater
2. Strange Neighbor
3. Aquatic Swingers of Nelson Bay
4. The Scorpion & the Hermit
5. Skelly, the Skeleton Shrimp
6. Octo Hunt
7. Naked Gills

Protect and Respect the Oceans

1. Ad Aqua
2. Meet Ramon
3. Conserve What We Love
4. Citsalp
5. Cozumel Reefs & Covid
6. Secrets of a Trash Filled Harbour
7. Shark Rescue
8. The Sea
9. Charmolypi
10. The Ghost Nets

Art House Flicks

1. Plastic Ecosystem
2. Keep it Clean
3. Lagoon
4. Gone Muse
5. Blue Aeolian
6. The Longing and the Sea
7. Unborn

1. Sand

2. Weird, But True

3. Sea Lion Behaving Badly

Made in Texas

4. Jellyfish & Herring

5. The Dance - Rays of the Sea of Cortez

6. One Decision Away

7. Evolution

8. Magic (in the) Grass

Sunday, April 3, 3 pm Show

Feature Length

1. Arthropoda Crustaceans
2. French Polynesia
3. This is Egypt - One Step Ahead
4. What Happened to You?
5. Freaks
6. Above, Below and Beyond
7. The Magic of Socorro
8. Freshwater
9. Backyard Diving
10. Wreck Island
11. Nothing Prepares You

12. The Art of Buoyancy
13. Other Plans
14. Time and Tides
15. Crustaceans
16. The Origin - Life Around the Hot Spring
17. Flying with Mantas - Socorro Islands
18. Blackwater - Anilao Style
19. Seasons
20. We
21. Tiger (Shark) King

Experiential Professional Development Courses

Space is still available in **Ecology Project International (EPI)** professional development courses this summer. These programs are field-based and include hands-on training in the NGSS. They are open to formal and informal educators; no application process is required.

Our program dates are as follows:

Baja, Mexico: May 28 - June 3, 2022

Maui, Hawaii: June 26 - July 3, 2022

Costa Rica: July 5 - 11, 2022; July 16 - 22, 2022

Galapagos: July 18 - 27, 2022

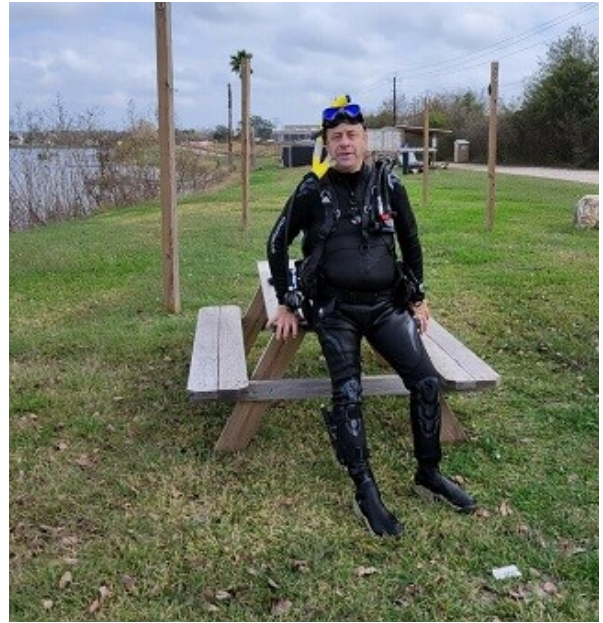

Yellowstone: August 6 - 13, 2022

You can access information about price, sample itineraries, and syllabi here: <https://www.ecologyproject.org/professional-development>

You should have been there!!

Brion Saathoff and Jim Carmin dove on February 13 and did a 64ft dive. They dive almost every weekend at Mammoth Lake, in Clute, Tx.

Great place to practice diving skills or camera skills. So, what are you waiting on? There is a standing invitation to

More Trips to think about

Cozumel — July 2—9, 2022

Cost is \$2149/person for airfare, resort all inclusive and diving and close location to dive boat.

Roatan — March 19—26 — Cost is \$2500/person including airfare — **details to come.**

Bonaire — November 24—27 (Thanksgiving Weekend)— Cost is \$2500/person for airfare—
details to come

Members please let us know who is interested and we will work out the details.

Lunarfin's History Corner

Sent in by Fred Toole

Davy Jones' Locker

OCT. 31, 1969

Five master divers, all members of the MSC Lunarfin's SCUBA club, joined 40 other divers from throughout the United States chosen to investigate an unknown part of the floor of the Gulf of Mexico. The five, E. L. Beckman, W. F. Moran, J. M. Peacock, F. C. Toole, and H. M. Scott, boarded the USS *Haynsworth* last August 7 to participate in an expedition sponsored by the Northwestern Gulf Mollusk Population Survey, supported by the Houston Museum of Natural Science.

The purpose of the expedition was to investigate several formations presumed to be coral or salt which had grown into domes rising from the floor of the Gulf, and to bring up samples of the organic and inorganic matter from these formations.

Needle in a haystack

Finding the reefs was a task in itself. The reefs were known to lie somewhere 130 to 150 miles south-southwest of Bolivar Roads, but no one knew exactly where. The search for one dome had to be abandoned. The cone was too small, the currents were too strong, and the water too deep for divers to be able to locate it. When the divers went down 240 feet without locating the cone it

was decided to move on to the coral-like formation. Finally, in the afternoon of the second day, this formation was located.

Dangerous work

The divers, working in teams of three, probed to depths ranging from 65 to 185 feet. At the latter depth, nitrogen narcosis ("Rapture of the Deep") was inevitable. Knowing that this could be expected, "simulations" were run before the expedition began, to give the divers a chance to see what their reactions would be to the kind of euphoria, similar to that produced by alcohol, which nitrogen narcosis produces.

There were other dangers—barracuda, water currents so strong that the divers had to use heavy diving lines to descend and ascend, their bodies trailing out at right angles to the lines because of the currents.

Safety precautions were stringent: two lifeboats were in the water at all times; teams of "safety" divers stood by to d

double-check each diver's stay time on the bottom and his decompression stops on the way up, and were on hand if the divers should lose their grip on the line and require assistance. A recompression chamber was also on board, in case of emergency.

The divers brought up samples of shell and sea bottom to be studied by the participating scientists. Divers Scott and Toole photographed what they consider some of the most beautiful coral formations they have ever seen, and some of the largest marine life identified in the Gulf. Jim Peacock was able to recover the second largest known example of one type of mollusc. In all, it is estimated that a year may be expended in analysing all that was recovered.

Channel 11 television will present a color documentary on the expedition, tentatively entitled "Project 24", in late November.

Piscine life flees the intruder's lens

You should have been there!!

CALM WATER COLOR STORM

BY

JANAVI MAHIMTURA FOLMSBEE

I have heard so many comments about the gallery and the art. Janavi's parents and sister came, they are all divers as well. Janavi's artwork is over the top fabulous. She is a very talented young lady, Janavi Mahimtura Folmsbee's designs has been selected for the largest space, a 240-foot tunnel to the International Terminal, which is located between Terminals D and E. If you get a chance, go into Houston to the gallery. .

The Lunarfins Scuba Club was organized in 1963 by a small group of divers who worked at the Manned Spacecraft Center, as Johnson Space Center (JSC) was known back then. The club grew primarily through the sponsorship of SCUBA training classes, local dive trips and social activities. Since that time, membership has broadened to include anyone interested in diving. The majority of our members are in some way affiliated with NASA but this is not a requirement for membership and we have members from all across the board.
