“Planning For Dive Safety”

Trish Ross — 25+ years as a Safety Professional/Rescue Diver.

Trish Ross will be presenting the topic Planning for Dive Safety.

As a Safety Professional and Rescue Diver, Trish brings insight to things that could go wrong and how to be prepared.

Most of us plan for our dive experience by having checklists of the type of diving we’ll be doing, climate and non diving activities. But are we also performing a hazard assessment?

Trish will lead us through that process of critical thinking, situational awareness for planning and onsite “in the moment” assessment. DAN is a amazing resource to assist with this process and knowing which items are value added. This presentation will combine knowledge, approach and best practices.

Lunarfins President's Notes

Hello Lunarfins Family,

I hope everyone had a great Cinco de Mayo.

We had a great presentation from Joe Campanelli on the shipwrecks of Truk Lagoon last month, thank you Joe for taking the time to put that together for us, Truk is one of my bucket list destinations.

We have a new member to the family, Welcome! Karen Rompot, she is one of my trainers and dive buddies from the dive team at Moody Gardens.

We have the new board in place and a new budget that needs to be voted on at the May 21st meeting.

According to the Lunarfins constitution you have to be current on the dues (April 2024-2025) in order to have a say in it or vote, you can find the application at the club website, if you don't want to mail it you can bring it with you to the meeting, I have had conversations in the past about why we have to fill out a new application each year and the most important reason is that there is a liability waiver in there for the club and its members, this is very important as we all know that scuba can be an inherently dangerous activity.

We will also have waivers at the Spring check out dive on June 2nd. in order to participate in the activities, sorry folks but it's just the way the world works these days.

Cathy is working on a way for people to do waivers and dues electronically, Welby is a little behind the times so it's taking some work on her part, Thank you Cathy.

So, a little bit about the spring checkout dive, Dennis has been kind enough to put together a flyer for us and a google forms so we can get an idea of the amount of food and refreshments to purchase, so if you are planning to attend please respond to it, we have also invited all the clubs to attend and anyone else that might be interested. we will be at Thunder Bay which is a pavilion at the back of the property past the RV park, entry fees for Mammoth are \$25 for divers \$10 for non-divers, the only swimming at the lake is for training and the swimmer has to be attached to a swim buoy at all times. The meal will be \$10 for non-members it will be free for members. All the information is in the flyer and at the Mammoth Lake Texas website. Please go to the website and fill out the waiver for the lake ahead of time so you do not create a traffic jam at the gate, this is normally a very busy time of the year. (you will not be popular with the line of divers behind you waiting to get in.) IF YOU ARE NEEDING A TANK OR RENTAL EQUIPMENT, I recommend you reserve it soon so you will know if it's available.

Anyone that is interested in helping out please let us know.

Our speaker for the next meeting is Trish Ross with Dan Safety, please join us, as I always learn something when I attend a meeting with a DAN presentation.

HUPS is hosting an underwater lighting workshop on June 1st from 1:30 to 3:30 at the Bayland community center. These are always great workshops and worth the effort to attend, if you can't make it in person, you can always zoom in.

We have the board meetings every other month, if you are interested you are welcome to join, the date and time is always in the newsletter and the zoom link and address for all of our meetings are also always in the newsletter on page one.

Thank you all for making Lunarfins an awesome club, we couldn't do it without y'all

Fins up. Tiny bubbles,

Best Regards,
Brion Saathoff
2024-2025 President!

**Happy Birthday! to
anyone that has
a birthday this month!
May your day be wonderful!**

Welcome to Our Newest Member

Karen Rompot

Hi Lunarfin's family. My name is Karen Rompot. I'm a native Texan who has a passion for diving. As a child Santa, brought our family tickets to Hawaii for Christmas in 1982. While there, my sister and I decided to discover scuba.... It was a beautiful day at the beach in Lahaina. We soon found out the conditions were horrible in the water. Couldn't see much but sand stirred up by the surf as I held onto my dive master. During that experience, I discovered I loved breathing underwater.

Upon returning to Kansas, it didn't take long to motivate my entire family to get certified in a dark cold lake where you couldn't see your hand in front of your face. We immediately had a change of scenery in Cancun and Cozumel and discovered a beautiful underwater world of coral, caverns, and marine life. We continued diving mostly in the Caribbean and Bahamas as a family of recreational divers.

I had a bit of a surface interval moving around a bit for school and work in the east coast and Chicago. In 2000 got tired of the ice and snow and moved to Houston Clear Lake and created a family. 2010 my son turned 10 became a diver and we resumed recreational diving career. Now that my son is a grown adult, I have been enjoying liveboards around the world. Volunteering with Moody Gardens dive program and diving any chance I can get. Grateful to be joining the Lunarfins family of divers.

Our General Meeting — South Shore Grille

Be sure to check out their menu

<https://soshoregrille.com/league-city-south-shore-grille-food-menu>

May 21st., 6:00pm

Come at 6pm—and order, 6:30—announcements & social

Speakers start at 7:00 pm

2800 Marina Bay Dr. League City TX 77573

Lunarfin's Raffle — Let's Make Some Money

Lunarfin's will be offering raffle items at meetings. Tickets will be very reasonable and the items raffled off will be interesting and worth having. The first raffle was a 16" x 20" print donated by Dennis Deavenport. It is mounted on foam board or Gator Board and ready to frame. Dennis is donating lots of his photo's. Each month will be a great item. Bring a few extra dollars to the meeting to help Lunarfin's make some money.

Your friendly Board of Directors

Prayers are still needed

This is **Peggy Widaman** Peggy lives in Ft. Worth, and she comes in every year for our Christmas party and has been since Randy Widaman (her brother) passed away in 2021. We need prayers for Peggy, in late December, she called me from ER and they told her she needed to see an oncologist right away. Well, it's taken this long to get her started on Chemo. Peggy has a mass in her Colon, and they have to reduce it before surgery. She has finished her 3rd round of Chemo, and came down so she could help out with HUFF. She is also getting a 2nd opinion with MD Anderson on June 4th. Bless her heart she has already lost her hair.

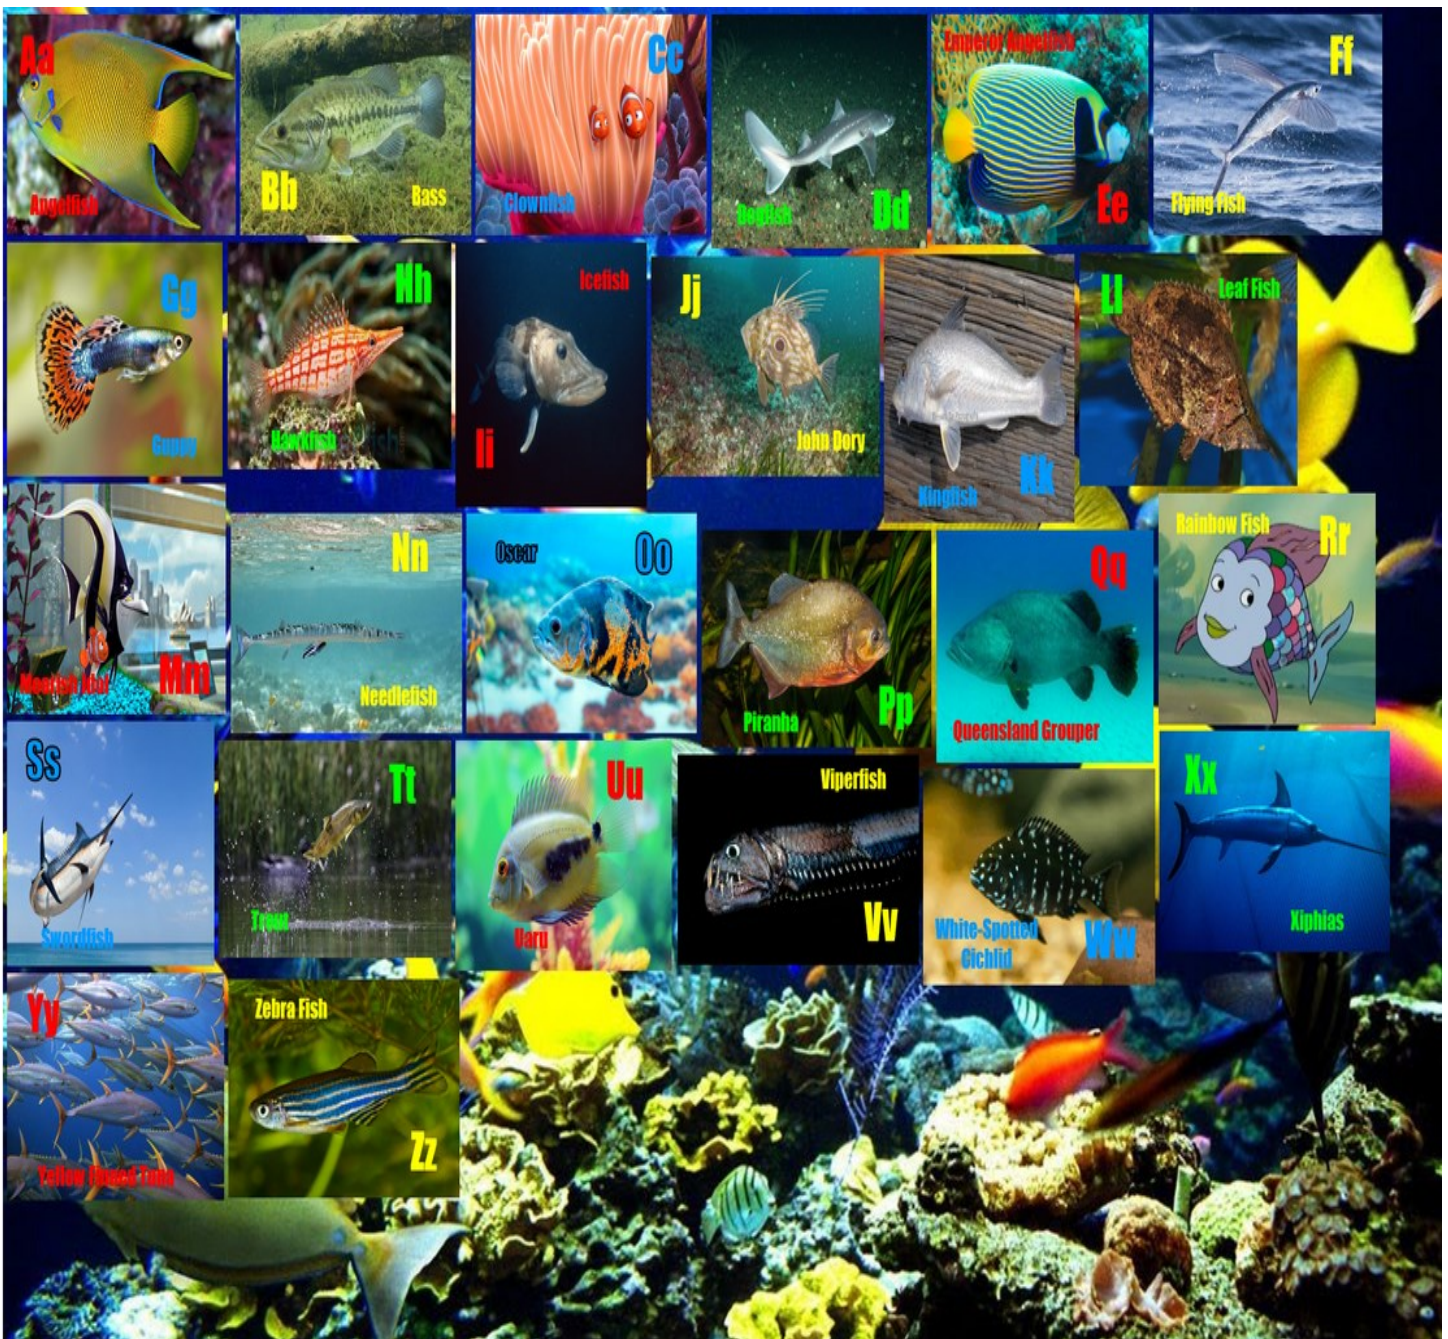

ABCs of Fish ID

Tuesday, May 14, 2024, 6-9 p.m. in-person in Galveston

Thursday, May 23, 2024, 6-9:30 p.m. online

Our fish identification classes focus on the top 40-50 tropical reef fish you are likely to see in Flower Garden Banks National Marine Sanctuary (FGBNMS). We provide information on body shapes, key markings, and coloration, as well as helpful phrases for remembering their names.

This information from the REEF curriculum created especially for FGBNMS, will help you on dive trips to the sanctuary or reef locations anywhere in the Caribbean. If you want to know more about what you are seeing, join us in Galveston or online this May.

Underwater Lighting Workshop

June 1, 2024

1:30-3:30

Join us in person at Bayland Community Center or via Zoom.

David Lenderman and Craig Beasley will lead a discussion of everything you need to know about lighting for underwater photography and videography. Lighting will make or break an underwater image. As underwater image makers we are in a unique position to be able to harness the power of natural light and artificial lights alone or together to create our best shot. This workshop will help you understand principles such as:

Using natural light

Balancing natural light with artificial lights

Types of strobe/video light options

One vs two strobes/video lights

Strobe/light positioning to best compliment the subject and shooting conditions

Snoot lighting to help your subject stand out from the background

Lighting for drama

Lighting for shooting in natural light -- yep, not a typo!

Specialty lights

IT'S NOT JUST GIGANTIC – IT'S **MAMMOTH**

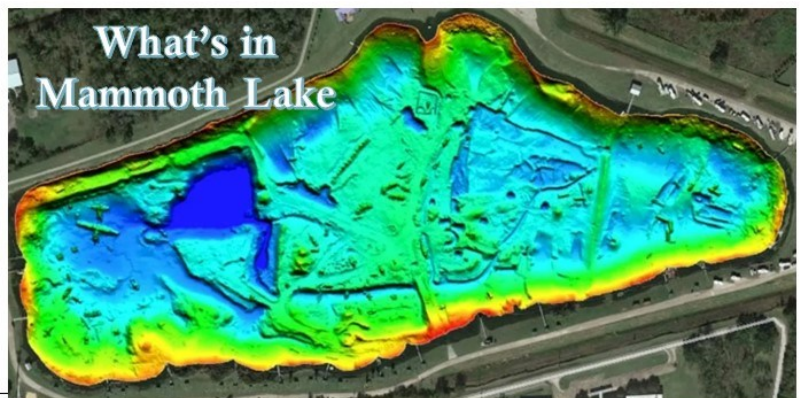

LUNARFINS / TGCC PICNIC & DIVE OUTING

Dennis Deavenport

Re: DAN Membership and Dive Accident
Insurance Age Restriction Exemption

Dear Dennis Davenport,

This document serves as official notification that you have been granted an age restriction exemption and are permitted to join DAN and enroll in a dive accident insurance plan. Once your membership and dive accident insurance applications have been submitted with payment, your Certificate of Insurance will be issued as proof of coverage.

This exemption replaces the age limitation information found in the eligibility section(s) of your DAN member handbook. If you have questions about your DAN membership or dive accident insurance coverage, please call DAN Member Services at +1 919-684-2948 or visit DAN.org.

As always, diver safety and protection are our highest priorities. Thank you for your continued support as we work to provide coverage for all divers.

Safe diving,

DIVERS ALERT NETWORK

About our Members

Stanley Fontenot

Natural Bridge Caverns
Discovery Tour.

I had an awesome time!
I'm thankful I was able to
get away and have some
fun with family in San
Antonio

Congratulations!!

Stanley Fontenot

I received my Dry Suit Card yesterday! After some classroom lecture, pool work, and two open water dives at Mammoth Lake, I have my card.

Diving in a bag is an interesting experience. Swimming through the water was a drag. Literally.....

Lots of gear to move through the water. I felt I had a decent handle on how much air needed in my suit so I wouldn't be squeezed too much vs the air in my bed for buoyancy.

It was nice to come out of the water after diving and be dry!

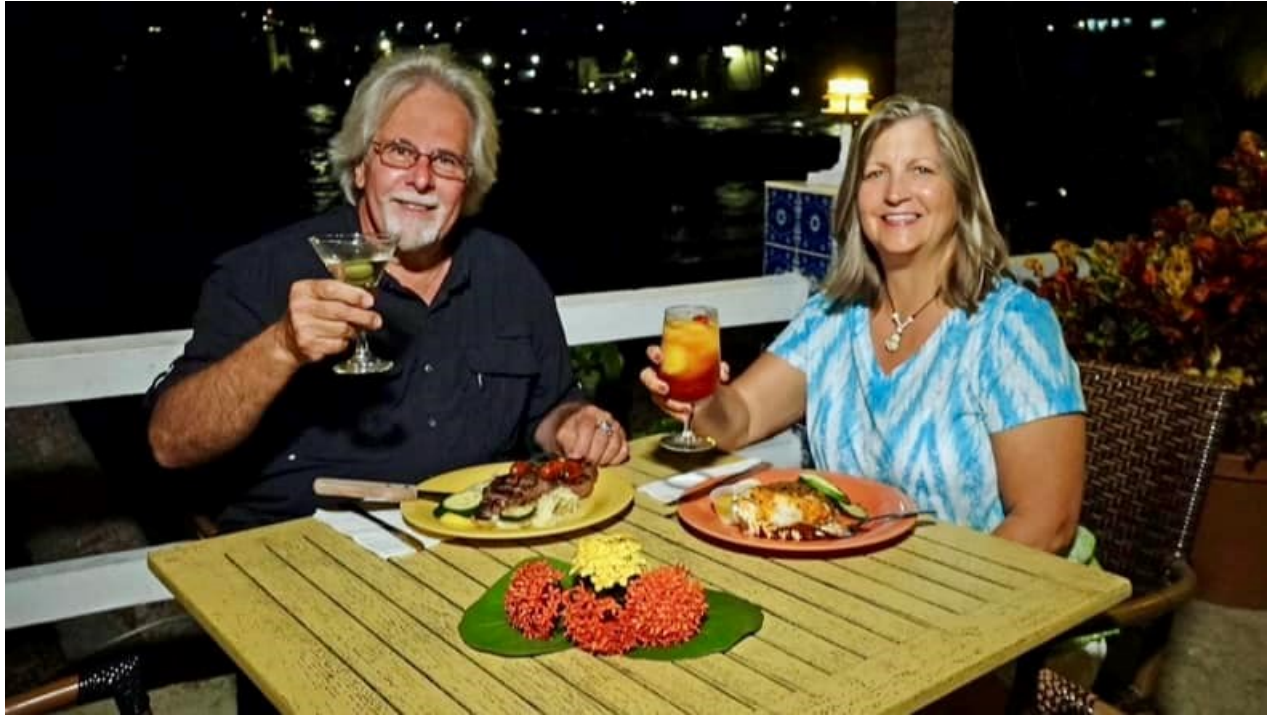

I will need to dive more in my drysuit to get comfortable with it.

I had an awesome instructor for this cert!!!!

Huuuummm what shall I do next.....

About our Members (Continued)

Paul Cater Deaton

Happiest of birthdays to this beautiful girl right here! - Happy Birthday, Monica!

When I first met **Fred Haise** decades ago, he was more than an astronaut; he flew with the Tora! Tora! Tora! Squadron. I had the honor of having lunch with him today at the [Lone Star Flight Museum](#) for the induction of the Texas Aviation Hall of Fame class of 2024

About our Members (Continued)

Paul Cater Deaton (Page 2)

About a month ago, I had the honor of speaking (and screening some of my work) at [Boston Sea Rovers](#) and [Beneath The Sea](#). They were back-to-back shows, so I just stayed in New England for 10 days.

Treated myself to a nice train ride from Boston to NYC, stayed at a really cool little hotel a block away from Times Square, made pilgrimages to the [Hard Rock](#) and [The Explorers Club](#) and saw [Monty Python's Spamalot on Broadway](#) with my good friend [Woody](#). Ended the Chinatown, then stopping by the Stevie Ray Vaughan art car at Houston Hobby Airport on the way back home.

The cool thing about playing a starfighter pilot is that, now and then, you run into people who are actually going to space. Met these two at [Lone Star Flight Museum](#).

About our Members (Continued)

Cathy Strahan

Well another dive trip is over, **Costa Rica was fun**. The diving was cold and murky, it was hard to get good photos. We saw a whale, some white tip sharks and felt a 5.5 earthquake! When my friend Liz and I went to the town of Coco Beach and were walking along the boulevard I thought we would see beach advisories on a bulletin board but instead we saw earthquake advisories!

About our Members

Justin Wallace Jr.
Turned 1 years old

True Stories Worth Reading

A 9-year-old boy's dream of a pet octopus is a sensation as thousands follow Terrance's story online.

The boy's family in rural Edmond, Oklahoma, humored him with toy versions of an eight-legged mollusk, but as Cal got older it became clear that only the real thing would do.

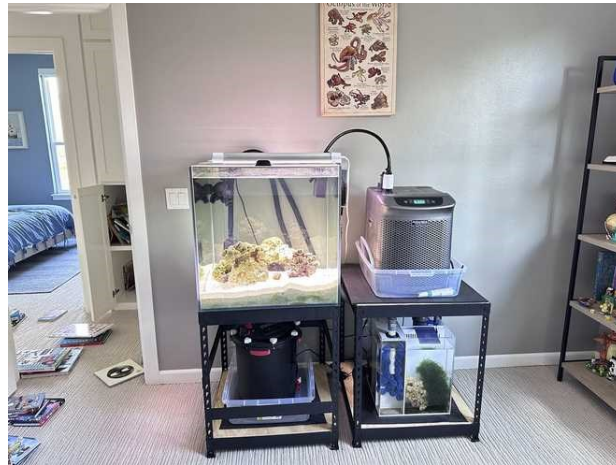

The child's father, 36-year-old dentist Cameron Clifford, researched the possibility with a local aquarium store and before long Terrance the California two-spot octopus, also known as a bimac, was living in a watery enclosure at the family home southwest of Oklahoma City.

"We really like to encourage our children's interests," said the older Clifford. "It's magical to see a kid embrace their dreams and bring them to fruition. Cal has been infatuated with the natural world and with marine biology since he was very little."

A popular [TikTok saga was launched](#) with the father narrating the tale of Terrance the cephalopod, using a faux British accent generated by the social media app. Eventually, hundreds of thousands of people were following.

Cameron Clifford via AP

Cameron Clifford via AP

Within weeks, the tale took an surprise twist when it was learned Terrance was actually a female as it laid some 50 eggs that the family initially assumed were unfertilized. Several weeks after that, teeny near-transparent octopus babies began hatching and were given names like Rocket Larry, Squid Cudi, Swim Shady, Jay-Sea and Sea-Yoncé. Cal had burst into tears at the family dinner table when his father first announced that the local aquarium store had told him adopting an octopus would be possible.

Father and son together researched what was needed, deciding on a saltwater tank and water cycling system and ensuring they would be able to source food for the soft-bodied sea creature.

The family's younger son Lyle and mom Kari also joined the project in their own ways. A family friend who is a reptile scientist has provided support and advice.

While female octopuses usually die soon after laying their eggs, Clifford said Terrance remains alive four months later.

Clifford said the family has gained much from the experience.

"Aside from the physical, financial and emotional requirements of owning a species such as a bimac, you will learn a lot about yourself in the process," the Arizona-born Clifford told TikTok followers in his app-generated accent. "There's always some valve or seal that's not completely closed, and your storm-resistant carpet isn't rated for gallons and gallons of seawater. You'll learn that seawater and electricity don't always get along."

"You will learn new things and meet incredible people and will learn that wildlife is magnificent," he added. "But most of all, you'll learn to love a not-so-tiny octopus-like Terrance."

True Stories worth Reading

For those of you who do not have or read Facebook, I want to share a true story I read this morning.

In December 1984, a group of 3,000 beluga whales were trapped by ice in the Chukchi Sea, near Russia. The whales were confined to small open water ponds surrounded by thick, impassable ice up to 10 feet thick in some areas.

Without access to larger areas of the ocean, the whales had difficulty breathing and were at risk of dying. To help rescue them, an icebreaker named Admiral Makarov was brought in, equipped with a specially reinforced ice-breaking hull. The ship attempted to take the whales to safety by breaking the ice, but the belugas initially refused to follow.

When the crew began playing classical music like Tchaikovsky over the ship's speakers, the whales finally began to follow the Makarov through the narrow open-water channel. This allowed 2,000 whales to reach the unfrozen ocean after a journey of almost 100 miles.

The successful rescue effort lasted several days and was later dubbed "Operation Beluga." It was a massive undertaking that involved several countries, including the Soviet Union, the United States, Canada, and Japan.

Credits goes to the respective owner ~

You should have been there!!

HUFF Pictures

FGBNMS

14,000 Year Old Rhodoliths Discovered in FGBNMS

Rhodo-what? Rhodoliths, also referred to as algal nodules, are rocks made of hard, crustose forms of algae.

The word rhodolith is of Greek origin with rhodo- meaning rose colored and -lith meaning stone-- rose colored stone or red rocks! This is the perfect description for these important habitat builders found in the [mesophotic zones](#) of the sanctuary. Rhodoliths accumulate into beds and are associated with high levels of biodiversity.

Rhodolith samples collected from 157–236 feet deep at [East Flower Garden Bank](#) and 338 feet deep at [Elvers Bank](#) were analyzed by The University of Alabama masters student Sarah Olmstead. Based on radiocarbon dating, she determined that these rhodoliths formed roughly 9,500 to 14,800 years ago!

Why is this significant? Rhodoliths and their slow growth rate suggests that recovery from ecological damage would not happen over human timescales. Their long timespan and carbonate structure may also be useful for climate studies.

Divers Alert Network

There has been much discussion in the dive industry about emergency exits on liveboards. While we hope for smooth sailing, being prepared for the unexpected is key.

- 🕒 If an alarm sounds in the middle of the night, swift action is crucial. Know your exit route by heart, even in darkness, and don't hesitate for anything.
- 🔍 During the boat briefing, pay extra attention to exit locations, especially in sleeping areas. They might be tucked away, so familiarize yourself with them beforehand.
- 🕒 Every second counts in an emergency. Skip the search for essentials by keeping a small go bag by your bed, packed with necessary meds, passport and travel documents, waterproof flashlight, whistle and phone.
- 🌙 Each night, restock your go bag so it's ready to grab at a moment's notice. Being prepared means peace of mind, even on the high seas.
- 👜 Make sure your go bag is small (no larger than 2 liters) so it doesn't impede your exit. A solid clip lets you attach it to your belt loop or lifejacket, so your hands remain free. A dry bag will float and keep medications and documents dry. A brightly colored bag will be easier to find if you lose it.

An emergency evacuation is never expected but always a possibility.

Read more here <https://dan.org/.../travel-smarter-be-prepared-with-a-go.../>.

American Charitable Watersport Activities Foundation

2024 Supporter Registration

The “American Charitable Watersport Activities Foundation” (ACWA) was established by SCUBA divers on March 31, 2023. ACWA is recognized by the IRS as a 501(c)(3) public non-profit charity. Staffed by non-paid volunteers, ACWA’s administrative and donation support is provided annually by members of our community.

Supporter Registration for the “American Charitable Watersport Activities Foundation” (ACWA) is open to Dive Clubs and Individuals who reside in the United States of America. 2024 registration is \$20.

“Supporters” on record for 2023 are listed on a “Supporter Master List” and need not complete this form. They continue their charity efforts with their 2024 payment of \$20 to ACWA’s treasurer - Mark Leiserowitz (contact information listed below).

New “Supporters” need to complete this form to provide ACWA with contact and IRS reporting information. To join as an individual (must be a certified scuba diver, or a member of a dive club) - fill out the application below. Please print legibly as e-mail addresses will be utilized to keep supporters abreast with the charity’s status and your name as identified below, used in any future donation reporting required by you or the IRS.

2024 TGCC MEMORIAL COLLEGE SCHOLARSHIP

The Texas Gulf Coast Council of Diving Clubs (TGCC) plans to award one College scholarships (1 @ \$500) during 2024. This scholarship is given in memory of Jack Allyn, John Anderson, Soodabeh O. Babcock, Randy Gray, Mike Griggs, Greg Grimes, Jean Himes, Anne Millioud, Clint (Dwight) Moore, Richard Mork, John Petty, Cynthia Ann Ramsey, Jackie Reid, Mary Lou Reid, John Ringrose, Wanda Roark, Peter Schmidt, Katie Springs, Margie M. Straight, Frank Strausborger, Michael Szewczyk, Randy Widaman, Ted Wimprine, Kenneth Young and Dick Zingula; deceased members of our dive community. It is also awarded in recognition for support of the TGCC Scholarship Program by Rodney Dwire, Alicia Grimes, the Houston Underwater Club, the Houston Underwater Photographic Society, Linda Petty and Russell Ramsey. The purpose of this award is to support the members who support the dive clubs in the Texas Gulf Coast area. The award will be paid by TGCC directly to the college towards tuition.

3

Eligibility Rules:

3

Scholarship applicant must be a college undergraduate or graduate student attending college in 2024, or a high school senior that has been accepted to college in 2024.

The applicant, the parent(s) (biological or through formal adoption), or the grandparent(s) of the applicant, must be an individual member of TGCC or a member of a TGCC member club with dues current in 2024.

Application (see other side) must be received by the TGCC Donations Committee prior to **June 30, 2024**. TGCC will review all completed applications on July 11, 2024.

Applicant shall have the high school/college furnish a transcript of grades, courses and class standing.

Scholarship General Guidelines:

Scholarship decisions of TGCC are final.

Scholarship winner is expected to keep TGCC abreast with his/her progress in college.

TGCC reserves the right to not award a prize depending upon the number of entries and qualifications of the applicants.

A personal interview with members of the TGCC Scholarship Committee may be required prior to awarding this scholarship.

Confirmation will be by e-mail. Make sure phone and e-mail data provided is current.

TGCC is offering this scholarship as a reward to TGCC members, TGCC member and associate clubs or the children of these members to thank them for supporting TGCC's efforts in promoting safe sport diving. The committee will take into consideration the applicant or applicant's parents involvement in TGCC and member clubs and/or the diving community in general.

Applications should be e-mailed to the TGCC Donations Committee Chairman:

You should have been at April General Meeting!

The Lunarfins Scuba Club was organized in 1963 by a small group of divers who worked at the Manned Spacecraft Center, as Johnson Space Center (JSC) was known back then. The club grew primarily through the sponsorship of SCUBA training classes, local dive trips and social activities. Since that time, membership has broadened to include anyone interested in diving. The majority of our members are in some way affiliated with NASA but this is not a requirement for membership and we have members from all across the board.
