

Lunarfins Scuba Club

September 15th — Walter Marti

Walter Marti is an award-winning underwater filmmaker and videographer dedicated to revealing the hidden wonders of the ocean depths. With a filmmaking career spanning decades, Walter captures stunning, emotionally resonant marine footage that bridges the gap between artistic expression and environmental advocacy. His acclaimed work has been celebrated at many international film festivals and contests. Through his lens, Walter invites audiences to connect deeply with marine life and recognize the urgent importance of protecting our global oceans. Walter has extensive experience as a Black Water diver. He has entered several films in HUFF and is highly regarded as an accomplished underwater videographer and filmmaker. When not diving, he lives in Southern California.

Lunarfin's President's Notes

Hello Lunarfins,

I hope everyone is well and made many memories this summer, as we move into the fall season we have lined up some social and dive events to provide opportunities for you to visit with old friends make new friends and do some diving while the water is still warm. We will be hosting the annual beach party at the Texas City Dike on September 26th and the annual pumpkin carving contest at Mammoth Lake on October the 11th, Cathy is organizing another Bingo social at Spring Creek BBQ in October details TBA.

The new rash guards are here, they look awesome, we did order some extras so we would have some in stock, for those who we did not have your size no worries Cathy is working on another order. Please contact her or JaVan if you are looking for something in particular.

Congratulations to my awesome dive buddy Dylan Huss on her 100th dive, She celebrated it at the FGBMNS on the MV Fling. We went for the Stetson Madracis coral spawn, it was an epic adventure, eleven dives in three days. We left the dock Thursday at 7:00 pm and socialized for the evening, A great group of friends were in attendance, Dennis, Andy, Dylan, Justin Wallace and Andre (our new friend from the Justin Wallace collection). Friday was two at Stetson 1, then the H1-474-A eight leg rig, then Stetson 3 afternoon and Stetson 3 night dive. Saturday was Stetson 3 then the H1-487 cutoff rig laying on its side ("awesome", part of the rigs to reef program) then Stetson 2 and a Stetson 2 night dive, early Sunday morning we dove the Kraken, (a first for Dylan and I).

And then we had a ceremony on the stern of the Fling over the Kraken so Andy could commit Pewee/ Captain Flys ashes to the deep and then we took his final dive with him on the Kraken, He will be missed, My dear friend Craig Beasley mentioned Pewee very eloquently in his HUPS presidents letter to us this month, if you are interested you can find it on the HUPS website, Thank you Craig,

I have gained a lot of dive buddies this year and been able to spend a lot more time under the water thanks to Lunarfins, HUPS, CHUM, The MV Fling and Mammoth Lake Texas.

I would like to give a special shout out to the MV Fling And Mammoth Lake for consistently working hard on making the dive experiences better for all of us in the dive community. I was told the scuba poker event at Mammoth-Thunder bay was a lot of fun and that everyone made new friends and dive buddies. Thank you Kirk for leading it and Javan, Mike C, and Cathy for helping run it and thank everyone that attended. It is all of you and the great times that you have that make these things worth the effort.

TTFN,

Best Regards and happy diving,

Brion Saathoff ><;;>

Happy Birthday to you!

May your day be filled with Happiness.

Billie Williams — Sept. 8th

Annette Hasbrook — Sept. 21st

Lunarfin's Raffle — Let's Make Some Money

Lunarfin's will be offering raffle items at meetings. Tickets will be very reasonable and the items raffled off will be interesting and worth having. Cathy Strahan, Ja Van Pruett Dwire and Dennis Deavenport have regularly donated for the Raffle. **.Thank you. Judith Jackson for your donation.**

Each month will have at least one item to pick from and you will not know until you come and see what is being offered... Bring a little *Mad Money* to the meeting to help Lunarfin's earn money for social events. If you have something you would like to donate please contact JaVan Pruett at <caladyfish@gmail.com>, she would love to hear from you.

Mooring Buoy Maintenance East and West Flower Garden Banks

Flower Garden Banks National Marine Sanctuary divers recently performed some much-needed repairs and replacements to the fleet of mooring buoys in the sanctuary. Over four days, the team was able to successfully install three new u-bolt anchors, which were cemented into reef rock: two at East Flower Garden Bank and one at West Flower Garden Bank. While mooring buoys were not placed on these bolts at this time, they are ready for the next time the team is offshore.

Mammoth Lake

Starting Sunday, September 6, we're kicking off the next round of expansion projects at Mammoth Lake Texas!

Over the next month, you'll see equipment moving, dirt flying, projects taking shape, and a few areas around the lake looking a little different.

Why?

Because we're continuing to invest in Mammoth and in the divers, instructors, dive shops, public safety teams, students, clubs, and families who make this place what it is.

Our goal is simple:

🧭 More opportunities to dive

🛠️ Better facilities

🌊 More to explore

👤 A stronger dive community

🐘 And an even better Mammoth experience.

And yes — **THE LAKE WILL REMAIN OPEN FOR DIVING!**

There may be temporary access restrictions around active work areas, so please pay attention to signs and instructions when you arrive. Reservations will continue to be required.

Some of what we're working on you'll see immediately.

Some of it might take a little longer.

And maybe... just maybe... we're not going to tell you everything yet. 🤔 🐘

Thank you to everyone who continues to dive with us, train with us, bring students to Mammoth, tell their friends about the lake, and support what we're building.

We're not finished.

In fact...

WE'RE JUST GETTING STARTED.

Mammoth Lake Texas

Texas Sized Diving. Mammoth Sized Adventure.

Last Minute Lunarfins News, ect.

Beach Party— Texas City Dike

Sept. 26th @ 10:00AM

One final note do not forget to mark your calendars for our annual end of the summer beach party on **September the 26th at the Texas City Dike**. It is always a fun social and if you bring a boogie board there is some decent body surfing after the large ships pass by in the distance. **Lunarfin's is supplying water, drinks & lunch. Don't forget to bring your chairs, umbrellas', sun screen.**

Lunarfins U/W Pumpkin Carving

October 11, 2026 - 10 AM to 2 PM
Mammoth Lake (Mermaid Beach), Clute, TX

Entry Fee* \$15.00 includes

- Carving Kit
- Pumpkin
- Prizes
- Food

**Park Admission not included*

To reserve pumpkin, RSVP by
Oct 6 to veghead59@msn.com
After Oct 6, you must bring your
pumpkin

About our Members

Paul Cater Deaton

For someone who has been on more missions to space than all but one other astronaut (they're tied at seven), Jerry Ross is pretty down to earth. We had lunch together earlier this week after an interview for a magazine article I'm working on. He's a really good guy.

Global coral reef coverage risks irreversible decline, new report warns

Coral reefs make up just 1 percent of ocean coverage, but host a quarter of all life in the sea.

https://www.aljazeera.com/news/2026/8/31/global-coral-reef-coverage-risks-irreversible-decline-new-report-warns?fbclid=IwY2xjawUHyUVwZG9mAWV4dG4DYWVtAjExAHNydGMGYXBwX2lkEDlYmJAzOTE3ODgyMDA4OTIAAR7FloJ-eWAZS33dd-ozWorJFFQ8gLcdol3A5z7UJmQF451AE-jkjeaNcT7RBAw_aem_gyXVu2ss_vGqEH_i7JtZtQ

Paul Cater Deaton

Damn, that guy was good.

I got to see Tim Curry perform at [Armadillo World Headquarters](#) a little after Rocky Horror came out. He was promoting his album "Read My Lips" and didn't do anything from Rocky, even though everyone was screaming for it. He did his own thing, unapologetically, and that's one of many reasons that he earned my respect as an artist.

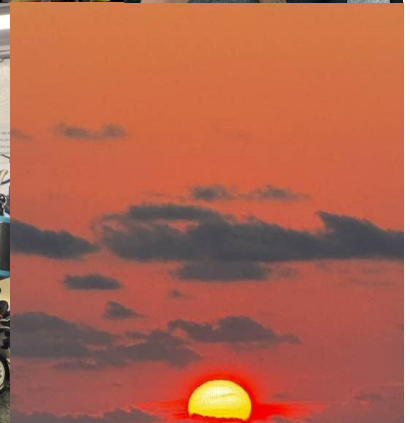

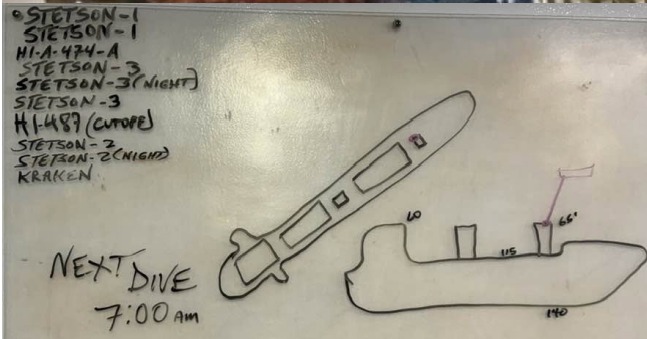

We did a pretty respectable job of Rocky Horror Show at the Pistarckle Theater, on St. Thomas. I played the arch enemy, Dr. Von Scott to Elgin Gordon's Frank N Furter.

About our Members

Dennis Deavenport

Last week on the Fling, we headed out to see the coral spawn event. The coral weren't in the mood and that part was a wash out. But later on one of the cut off rigs sunk at about 80 ft to the top, I saw several Bristle Worms taking up the spawning slack. It was cool. Andy Lewis took the photo of me filming "Sex on the Rig"

National Ocean Service, NOAA

Deep Diving and Innovation to Restore the Gulf's Mesophotic Corals

Deep in the Gulf of America lies a vital but little-known habitat. In the "mesophotic" (middle light) zone are coral ecosystems that are essential to the Gulf's food web. In 2010, the *Deepwater Horizon* oil spill injured extensive areas of this important environment. Today, scientists across federal agencies and partner organizations are working together to restore these foundational habitats.

In the spring of 2026, a mission on board [NOAA Ship Nancy Foster](#) set out to achieve ambitious restoration goals. The team focused on planting propagated corals of species *Swiftia exserta*, *Muricea pendula*, and *Thesea nivea*, and collecting samples to better understand the seafloor and local water quality. Some of the corals were planted on new [dome-shaped concrete structures](#). They were specially designed by [Marine Applied Research and Exploration](#) to support coral growth and provide habitat for other small marine animals.

This mission saw the debut of the "coral torpedo," an invention by Chris Gardner, fisheries biologist with NOAA's Southeast Fisheries Science Center. Designed with a streamlined shape, the "coral torpedo" travels quickly through the water column, acting much like the pneumatic tubes at a drive-through bank teller window to deliver precious coral cargo to the seafloor efficiently and safely.

Read more: <https://www.fisheries.noaa.gov/feature-story/deep-diving-and-innovation-restore-gulfs-mesophotic-corals>
[Mesophotic Restoration in the Sanctuary](#)

Not all benthic areas in the Gulf were injured by the oil spill. Dozens of sampling trips by the DWH Trustees documented no evidence of exposure to DWH oil, dispersants, or disruptive responses within Flower Garden Banks National Marine Sanctuary. However, long-term monitoring studies within the sanctuary have provided crucial data to support [Mesophotic and Deep Benthic communities restoration](#) throughout the Gulf. By developing a better understanding of healthy, unimpacted habitat, experts can more effectively implement restoration and evaluate progress in impacted areas. Recent efforts to install deep mooring buoys, remove marine debris, and remove invasive species also provide additional protection to these habitats within the sanctuary.

Mesophotic Habitats

While the sanctuary is well known for the beautiful coral reefs perched atop East and West Flower Garden Banks, these areas only account for a tiny fraction of the entire sanctuary. The majority of sanctuary habitats exist 130-725 feet (40-221 meters) beneath the waves in an area known as the mesophotic or "twilight" zone.

Sanctuary Steward Spotlight

Meet our Steward Spotlight, Rachel Bowman! Known as the "[Lionfish Huntress](#)," Bowman has helped remove thousands of invasive lionfish from Flower Garden Banks National Marine Sanctuary and founded Lionfish Invitational Inc. to support removal trips and research. In 2024, she was named the sanctuary's [Volunteer of the Year](#).

Bowman also processes specimens, conducts dissections and tags fish so scientists can study lionfish movements and impacts on sanctuary reefs. Her efforts have supported numerous research projects while helping protect millions of native reef fish from predation. She also connects commercial fishermen, scientists and sanctuary managers, encouraging them to share information and work together.

Citizen Science in the Sanctuary

Due to the remote location of Flower Garden Banks National Marine Sanctuary, sanctuary staff are limited in how often they can visit and collect data. Citizen scientists can help us fill in the gaps by telling us about their visits, including general observations about the health of the reefs and the types of wildlife they see there. [Be a citizen scientist today!](#)

PROPOSED TRIP – SEPTEMBER 2027

THE MALDIVES on the DUKE OF YORK LIVEABOARD

Dates: September 12-19 or 19-26, 2027

Boat specifics:

- **118 ft long luxury dive yacht, metal construction**
- **UK style outlets, 220V**
- **Rooms for up to 25 guests but 20 max is normal.**
- **Three room styles**
 - **There are 11 cabins onboard the Duke of York. 3 on the upper deck - 2 with twin beds and 1 with double/twin bed. 8 on the lower deck - 3 are twin bed, 4 can be used as double, twin or triple share, and 1 cabin can be used for single occupancy. All cabins have private bathrooms.**
 - **Standard rooms - \$2310 (\$2136 after 7.5% discount)**
 - **Deluxe rooms - \$2510 (\$2322 after 7.5% discount)**
 - **Suite (or Superior) - \$3465 (\$3205 after 7.5% discount)**
 - **Lower deck single bed cabin (price not available right now)**
 - **Third person sharing a cabin with 2 friends – 20% discount**
 - **One additional free for 10 paid (to be distributed to all who pay)**
- **Nitrox included, \$30 for park fee, \$84 a green tax, \$140 service Charge (crew tip)**
- **Spa on top deck**
- **One full-service dive tender for all dives but dropping divers at 2-3 different locations per dive to avoid overcrowding. Dive gear stays on the tender between dives.**
- **A range of shore options for add-on extensions (to be negotiated later as people choose to stay longer)**

Divers brave deadly 'Mount Everest of shipwrecks' as famed wreck breaks apart

The Andrea Doria was the pride of postwar Italy. A glamorous transatlantic ocean liner, she was a "floating art gallery" and a marvel of mid-century modern ..

By [Andrea Margolis Fox News](#)

Published [September 3, 2026 12:20pm EDT](#)

Some 240 feet beneath the ocean lies a shipwreck so dangerous and difficult to explore that divers have dubbed it the "[Mount Everest of shipwrecks](#)" — and it's right off the coast of the U.S.

The wreck's depth and unforgiving conditions leave little room for error. "Even expert divers have had challenges," retired U.S. Coast Guard Capt. Aaron Davenport told Fox News Digital. Now, after 70 years beneath the Atlantic, the Andrea Doria itself is [another hazard](#) as it continues to deteriorate.

"The Andrea Doria is breaking apart. And [as] it's moving around, things are falling," Davenport said. Longtime Andrea Doria explorer John Moyer, who has made over 100 dives to the wreck, said in a 2022 interview that divers have watched it "decay and fall apart." Speaking to dive magazine X-Ray Mag, Moyer said the steel hull was collapsing onto itself and described the wreck as being in its "final stage" of flattening.

"It looks so dramatically different," Stockton Rush, the CEO of OceanGate, told the Associated Press. "When you look at the shape of the hull, it appears a lot has come off."

The Andrea Doria had been sailing for just three years when she met her end at 11 PM on a foggy night and was approximately 40 miles off the coast of Nantucket, Massachusetts, when she [collided with another passenger liner](#), the Stockholm, in a fog bank off the coast of Nantucket on June 25, 1956. She was carrying nearly 1,700 people, including passengers and crew, the Andrea Doria was on the last leg of a transatlantic journey that originated in Genoa, Italy. Generations of divers have made the dangerous dive to the wreck, leading to the Andrea Doria's moniker, the "Mount Everest of shipwrecks." New underwater sonar imaging of the wreck, however, shows that it has [deteriorated far more than previously imagined](#). The underwater images were taken by an exploration company called OceanGate, which mans an underwater vehicle that allowed them to take detailed images of the abandoned hull.

Forty-six of her passengers and crew were killed, including several families of Italian immigrants to the United States. Improvements since the sinking of the Titanic several decades before, particularly the quick responses of nearby ships, meant that the loss of life as a result of the crash was relatively small.

The total casualty count on both the Stockholm and the Andrea Doria was just 51. Although crippled by the collision, the Stockholm was able to limp back to New York, with both its own passengers and many of the Andrea Doria's. Hours after rescue operations concluded, the Andrea Doria sank beneath the waves nearly 12 hours after the initial collision, at 10 AM on June 26, 1956.

Since that time, [dozens of divers have attempted the 240-foot dive](#) to the wreck. Although many expeditions have been successful, swift currents, poor weather, and the freezing New England waters have led 16 divers to their deaths instead.

For this reason, underwater imaging company OceanGate sent its Cyclops 1 submersible to the wreck in order to [capture updated images](#) of the sunken ship — and what it found was shocking.

Rush told the Associated Press that the images captured by the Cyclops indicate that the ship's bow has broken off, sometime in the last several years. Much of the ship is now unrecognizable due to decay.

"When [the Andrea Doria] first went down, it was pristine and you went straight into the hull and through the windows," Mr. Rush told the Boston Globe. "Now, it is harder to get inside and far more dangerous. Imagine it as a collapsing cave. Once the cave loses its basic structure, it deteriorates very quickly."

For more information: <https://www.foxnews.com/travel/divers-brave-deadly-mount-everest-shipwrecks-famed-wreck-breaks-apart>

American Charitable Watersport Activities Foundation

2026 Supporter Registration

The “American Charitable Watersport Activities Foundation” (ACWA) was established by SCUBA divers on March 31, 2023. ACWA is recognized by the IRS as a 501(c)(3) public non-profit charity. Staffed by non-paid volunteers, ACWA’s administrative and donation support is provided annually by members of our community.

Supporter Registration for the “American Charitable Watersport Activities Foundation” (ACWA) is open to Dive Clubs and Individuals who reside in the United States of America. 2026 registration is \$20.

ACWA’s Donation Committee optional targets for 2026:

o Sea Camp Scholarships

o Houston Underwater Film Festival – Pay discounted ticket costs for Marine Biology or Film Study students to attend. Donation would go to cover the MATCH theater portion of each ticket, HUFF would no charge their portion of each ticket.

o Adaptable

o Turtle Conservation

New “Supporters” need to complete this form to provide ACWA with contact and IRS reporting information. To join as an individual (must be a certified scuba diver, or a member of a dive club) - fill out the application below. Please print legibly as e-mail addresses will be utilized to keep supporters abreast with the charity’s status and your name as identified below, used in any future donation reporting required by you or the IRS.

You should have been at August General Meeting --It was Awesome!

The Lunarfin's Scuba Club was organized in 1963 by a small group of divers who worked at the Manned Spacecraft Center, as Johnson Space Center (JSC) was known back then. The club grew primarily through the sponsorship of SCUBA training classes, local dive trips and social activities. Since that time, membership has broadened to include anyone interested in diving. The majority of our members are in some way affiliated with NASA but this is not a requirement for membership and we have members from all across the board.
